

Mole Check Chart: Indicators of Possible Melanoma

A symmetry	Asymmetry is when one half of the mole is not equal to the other in size, shape, color, or thickness.
B order	The mole's border is irregular: ragged, scalloped, blurred, or indistinct (poorly defined).
C olor	Variation of color within a mole, or different shades of browns, tans, blues, reds, whites, and blacks.
D iameter	The mole's diameter is greater than a pencil's eraser (approx. 6 mm) in size.
